Banyan Woods Home Owners Association implemented Apollo Metro LED lights with integrated camera

- enable access monitoring through live video stream and video recording

“ We love the Apollo Metro LED lights with integrated camera. The hidden camera allows us to monitor access without being noticed and I can even view the live video feed from my cell phone.”

APOLLO METRO LED LIGHTS WITH CAMERA ENABLE BANYAN WOODS TO MONITOR ACCESS REMOTELY THROUGH VIDEO FEED AND RECORDING

OPPORTUNITY

Banyan Woods sought to increase security measures for its gated community by monitoring access.

SOLUTION

Apollo Metro installed LED lights with integrated Mobotix cameras in order to provide the community and its management company 24-hour, remote security monitoring. The LED lights ensure high visibility even during night time hours.

ADDITIONAL ADVANTAGES

- Remote viewing of high-resolution live feed - even from smartphone
- Records and sends alerts when movement is detected
- Stealth viewing due to camera's location behind glass
- Video recording enabled even when internet is down
- Camera can zoom in and change point of view
